

Sustainability Statement

March 2012

In this statement the term 'sustainability' includes the natural, built, economic and social environments of the Anson Engine Museum.

The Museum recognises its sustainability obligations to its staff, volunteer, visitors, communities – both locally and globally – and to present and succeeding generations.

The Museum is committed to implementing the requirements of all relevant sustainability legislation and regulations and, where possible, exceeding any relevant minimum requirements.

The Museum will manage activities over which it has control and which impact upon its various 'environments' in accordance with the principles of sustainable development.

The Museum aims to raise the sustainability awareness of its staff and encourages them to apply sustainability practices at work with a view to minimising environmental impacts.
